

## Southern Phone Guide to setting up your modem

### nbn Fibre to the Premises

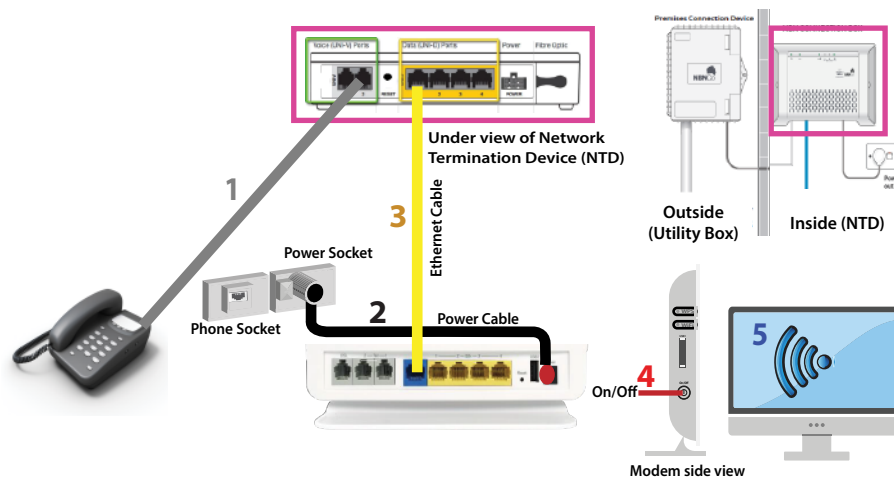

Your nbn service is connected via a nbn Connection Utility box outside your home and a Network Termination Device (NTD) installed inside your home.

#### Important

The NetComm modem router has been pre-configured with your details, it will connect without requiring any additional settings.

Once you have connected your modem, and you are connecting your device(s), you will be prompted to enter your **WiFi password**. Your WiFi password is on the label on the back of your modem and on a card in the package you received your modem in.

### nbn Fibre to the Premises

- 1** Connect your home phone into the Voice (**UNI -V**) Ports in the Network Termination Device (NTD). You can only connect your phone if your plan includes a nbn phone service.
- 2** Connect the power cord supplied into the back of the modem and into the power socket.
- 3** Connect the yellow ethernet cable into the the back of the modem **Blue WAN Port** and into the NTD, **Data (UNI-D Ports)**.
- 4** Turn on the power on the wall socket and push in the On/Off button on the side of the modem, the power light on your modem will go green.
- 5** Connect your devices via WiFi using the password\* on the back of your modem
